AP Calculus Summer Assignment 2025-2026

This assignment must be turned in on the <u>first day of class, Monday August 11, 2025.</u> The exception is if you are new to our district and obtained the assignment after August 8, 2025 (In which case it is due the second Monday of School). You must show all your work. This will be counted as your first quiz grade and will be graded on effort and completion. If you have any questions, please email me.

<u>Sugalskm@manateeschools.net</u>

1. Please check out our textbook from the media center: <u>Calculus a single Variable</u> by Larson and Edwards

2. Please have the attached Pre-Calculus review problems completed with all work shown for the non-calculator sections.

3. Memorize the unit circle in radians (coordinates of the special right triangles) Also, review your Pythagorean identities and your double and half angle formulas for sine, cosine and tangent. You will have a timed quiz on the unit circle the first week of school (180seconds). You will have a quiz on the identities and formulas the second week of school.

4. You must have your own graphing calculator for this course. The AP Exam requires that you be proficient in the use of the graphing calculator. I will be using a TI84 and 83 Plus in class. If you choose not to purchase your own, you must check one out of the Media Center.

5. Please review these dates:

   Mock AP Exam (due to hurricanes) Saturday 4/18/25 at 9 am. Otherwise we will do the practice tests in class.
   AP Exam: In the first two weeks of May.

6. Boot Camps: to be determined (depends if we have any hurricane days)

7. AP Calculus Exam TBD

8. In addition to reviewing the functions listed, you also need to memorize:
a. $y = \sqrt{r^2 - x^2}$ is a semi-circle, where r is the radius;

b. $y = \frac{|x|}{x}$,

c. Geometry:

        1. Cylinder-is the radius constant?

        2. Cone-is the radius Constant?

        3. What is the area of a circle?

        4. What is the circumference of a circle?

        5. Know the area and volume formulas that you should have memorized in Geometry.

        6. If a dimension is constant (fixed), does it change over time?
