

Daily Health Screening Checklist

Parents: Per CDC Guidance, Bayshore High School families are asked to complete Daily Health Screenings BEFORE sending your child(ren) to school each morning.

SECTION 1: SYMPTOMS

If your child has any of the following symptoms, that indicates a possible illness that may decrease the student's ability to learn and put them at risk for spreading illness to others. Please check your child for these symptoms:

- 100.4 degrees Fahrenheit or higher
- Sore throat
- **New** uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
- Diarrhea, vomiting, or abdominal pain
- New onset of severe headache, especially with a fever

SECTION 2: CLOSE CONTACT/POTENTIAL EXPOSURE

- Had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with confirmed COVID-19
- Had close contact with person under quarantine for possible exposure to COVID-19.
- Traveled to or lived in an area where the local, Tribal, territorial, or state health department is reporting large numbers of COVID-19 cases as identified by the CDC.
- Live in areas of high community transmission (as described in the [Community Mitigation Framework](#)) while the school remains open

If your child exhibits any of these symptoms in section 1 and has any possible contact/exposure to Covid-19 from section 2, we ask that you do not send your child to school. Please also be sure to reach out to the school(s) and/or Health Department as needed.

Thank you
