

W.D. Sugg Middle School is seeking financial assistance to help cover Registration, Flight and Hotel dues to attend the 2023 TSA National Conference. We have a dedicated TSA course and class that are actively engaged in curriculum designed around the TSA Competitive Events Guides. From Technical Design, Inventions & Innovations and System Control to Promotional Marketing and Leadership Strategies.

W.D. Sugg Middle School has been accepted into Project STEM. This program brings together comprehensive materials, resources, and extensive support to implement an engaging project-based education. We have also just affiliated with WOZ Education which provides hands-on innovative curriculum and training programs to foster student development in technical education. With the support of these programs and many other resources W.D. Sugg Middle School has developed a comprehensive Technical Education program. We are also affiliated with Garner Holt Education through Imagination the world's leading manufacturer of theme park animatronics. We have the brightest and most ambitious students working on technologically advanced projects with aspirations of competing on a National scale. W.D. Sugg's TSA Chapter is enthusiastic about this possible experience and actively working on their projects in preparation for this upcoming conference.

After a successful State Conference in February, we have been extended the opportunity to attend the Nation Conference in Louisville Kentucky. In order for our students to accomplish this goal we would need financial assistance to help mitigate the cost for registration, flight, and hotel. In the past we have held fundraisers selling items made in class on our classroom equipment/machinery. This was enough to allow us to attend TSA States in Orlando. However, traveling cross country comes with a higher financial burden.

Your generosity will truly make a positive impact on the lives of our TSA members.
